CNG Products

Receptacles, Ball & Check Valves
Filters, Tube Fittings

- ECE R110 & AGA / CGA NGV Compliant for NGV application.
- 100% factory tested

HY-LOK CORPORATION

Introduction

Hy-Lok's receptacle is designed for permanent mounting to a compressed natural gas vehicle (NGV). QC1 Series receptacle utilizes the AGA / CGA NGV 1 profile allowing complete interchangeability to any nozzle conforming to the AGA / CGA NGV 1 standard. Tested and certified for this application per AGA / CGA NGV 1 & ECE R110 QC2 Series receptacle is designed specifically for bus and trucks refuelling, receptacle is designed to provide superior flow characteristics.

Features

- Receptacle contains a highly reliable non-contact check valve that opens only when differential pressure is present during fueling.
- Internal check valve provides unidirectional flow.
- Construction material - available in stainless steel or brass.
- Self-Centering Poppet.
- Standard protective dust caps are supplied with all receptacles.
- Optionally with particle filter available (50 Micron).

Technical Data

- Maximum Operating Pressure : 3600 psig (250 bar) @ 100 °F (38 °C)
- Operating Temperature Range : From -40 °F to 250 °F (-40 °C to 121 °C)

S316

Body Material Designator

- S316: 316 Stainless Steel
- BRAS: Brass

Introduction

Hy-Lok's CNG Series Manual Ball Valves are designed to live loaded type for long cycle life and high pressure.

The valves provide quick 1/4 turn on-off control of flow the vehicle tank to the engine.

Tested and certified for this application per AGA / CGA NGV 3.1. & ECE R110

Features

- Disc spring loaded seat
- Low operating pressure
- Handle indicates direction of flow
- Panel mounting
- 1/4 turn on-off control
- 316 Stainless Steel construction
- Bi-directional flow
- 100% factory tested

Technical Data

- Maximum Operating Pressure : 6000 psig(414 bar) @ 100 °F (38 °C)
- Operating Temperature Range : From -40 °F to 250 °F (-40 °C to 121 °C)
- Cv Ratings : 1.04 to 5.39

Material of Construction

Description	Material / ASTM Specification
Body	SS316 / A182 or A479
End Connection	SS316 / A479
Ball	SS316 / A479
Stem	SS316 / A479
Stem Packing	PCTFE
Seats	PEEK
Seals	Viton

S316

Body Material Designator

- S316: 316 Stainless Steel

Introduction

Hy-Lok's 700H Series Check Valves are designed for flow control CNG. Tested and certified for this application per AGA/CGA NGV 3.1. & ECE R110

Features

- Inline check valve.
- Back stopped pppet.
- NBR seat design.
- Cracking pressure inclue : 1/3, 1, 5, 10, 25psig.
- Indicator Ring for easy identify the cracking pressure.
- 100% factory tested.

Technical Data

- Maximum Operating Pressure : 6000 psig (414 bar) @ 100°F (38°C)
- Operating Temperature Range : From -40°F to 250°F (-40°C to 121°C)
- Flow Coefficient (Cv): 0.67 to 4.7

Material of Construction

Description	Material / ASTM Specification
Body	SS316 / A479
Connector	SS316 / A479

Filter

Introduction

Natural Gas Vehicle Filter product is designed to protect critical engine components in compressed natural gas Vehicles(NGV). Contaminants can be introduced into the vehicle's fuel tank when being fueled. Contaminants may come from CNG compressors and storage facilities. These unit is specifically designed to remove oil, water and solid contamination from compressed natural gas. The Hy-Lok's filter remove over 95% of all aerosols in the 0.3 to 0.6 micron range.

Features

- Hy-Lok's filter is designed to use with CNG systems.
- Durable construction and simple servicing.
- Small size allows for installation versatility.
- Removes over 95% of all aerosols in the 0.3 to 0.6 micron range
- Easy to change filter element.
- Maximum burst pressure of 16000psig.

Technical Data

- Maximum Operating Pressure : 3600 psig (250 bar) @ 100°F (38°C)
- Operating Temperature Range : From -40°F to 250°F (-40°C to 121°C)
- Rated Flow : 30 SCFM @ 100psig
- Pressure Drop : 0.5 to 1psig

Dimensions and Note

Installation Note

The unit should be located in an accessible and protected location for easy servicing. Maintain at least 3" (76mm) of clearance below the unit for element access. The drain port must face down.

Service Note

The unit must not be under pressure during serving. Injury to personnel may result. Close the shut-off valve shown in the illustration above and slowly relieve line pressure before attempting service.

Replacing the Element

Change the element at the same time as engine oil filter changes or at least every 5000km.

Draining the Housing

Drain the housing every 2500km or as necessary. With line pressure relieved, remove the drain plug using a wrench, then cleaning the plug.

Material of Construction

Description	Material / ASTM Specification
Header	Anodized Aluminium 6061
Housing	Anodized Aluminium 6061
Seal (O-Ring)	NBR
Filter Element	Polyethylene (Gade 10)
Drain Plug	Stainless Steel 316
Base	Nylon

Installation Diagram

Purge Valve

Introduction

Hy-Lok Purge valves are for bleed, vent or drain purpose manually. The knurled cap is not separable from the valve body for safety purpose. 1/4 turns of wrench pull-up from finger tight give leak-free closure on first make-up. See our Purge Valves (H-100BPV) for more information (working pressure, ordering information, Dimensions, etc).

Features

- Pressure rating up to 4000psig(275bar)
- Vent hole is bleeds excessive liquid or gas from system lines.
- Knurled cap is crimped to valve body for prevents accidental remove from body.
- Size range from 1/8" thru 1/2" tubing and piping system.

Micron Tee Filter

Features

- Replacement of filter elements with body in line.
- Compact and robust integral union bonnet design.
- Filter elements are made of sintered stainless steel.
- Tested and certified this application per ECE R110.

Technical Data

- Maximum Operating Pressure : 6000 psig (414 bar) @ 100°F (38°C)
- Operating Temperature Range : From -40°F to 250°F (-40°C to 121°C)

Material of Construction

Description	Material / ASTM Specification
Body	SS316 / A479
Sintered Element	Stainless Steel
Seal (O-Ring)	Viton
Element Seal	PTFE

Tube Fitting

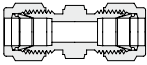

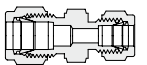

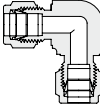

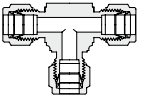

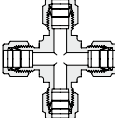

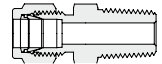

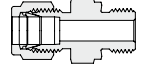

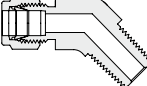

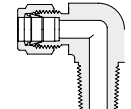

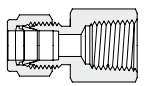

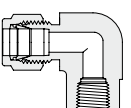

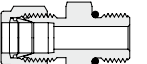

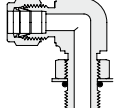

Introduction

Hy-Lok's Tube Fittings are designed for excellent gas-tight sealing and vibration fatigue resistance.

Tested and certified for this application per ECE R110 (for NGV application).

See our Tube Fitting Cataloge (H-200TF) for more information(working pressure, ordering information, Dimensions, Size, etc).
